

SAMUEL XHIXHO

JUNIOR FULL-STACK DEVELOPER

Final-year Applied Informatics student and junior full-stack developer with hands-on experience building responsive websites, database-driven applications, and mobile applications. Comfortable working with JavaScript, React Native, PHP, Java, SQL, and Supabase. Currently developing CircleChat while strengthening backend development, database design, deployment, and software problem-solving skills.

SELECTED PROJECTS

CircleChat

React Native, Expo, Supabase, Firebase

- Developing a real-time mobile messaging application with authentication, direct conversations, and database-backed chat data.
- Implemented stable message pagination, swipe-to-reply interactions, automatic notifications, and block-user database logic.
- Built the interface around reusable theme values to support future per-user and per-chat visual themes.

Responsive Business Websites

HTML, CSS, JavaScript, Netlify

- Designed responsive multi-page website demos for barbershop, car-detailing, and bakery businesses.
- Added mobile navigation, WhatsApp contact flows, Google Maps integration, service sections, galleries, and contact forms.
- Prepared projects for free hosting, custom domains, SEO basics, and client hand-off.

Developer Portfolio

HTML, CSS, JavaScript

- Created a responsive personal portfolio to present projects, technical skills, professional links, and downloadable CV.
- Structured the site for easy updates as new projects and job experience are added.

PRACTICAL EXPERIENCE

Independent Web Development Projects

2026 - Present

- Plan, build, test, and deploy responsive websites from initial design through final hosting.
- Translate business requirements into clear page structures, mobile-friendly interfaces, and practical contact flows.
- Use Git and GitHub to track changes and maintain project versions.

CAREER OBJECTIVE

Seeking a junior developer or internship opportunity where I can contribute to real software projects, learn from an experienced team, and continue growing across frontend, backend, mobile, and database development.

References and additional project details available upon request.
