TECHNICAL SKILLS

FRONTEND

Angular, TypeScript, HTML5, CSS3, Responsive Web Design

MOBILE

Kotlin, Jetpack Compose, React Native, Expo

BACKEND & APIS

Spring Boot, Java, REST APIs, Supabase

DATA & INFRASTRUCTURE

PostgreSQL, Redis, MySQL, Docker, Flyway, Testcontainers

TOOLS

Git, GitHub, Postman, VS Code, IntelliJ IDEA

EDUCATION

Bachelor in Applied Informatics

Marin Barleti University (UMB)

2023 - 2026

Studies completed | Diploma pending

PERSONAL DETAILS

- **Date of Birth:** 12 September 2004
- **Age:** 21
- **Nationality:** Albanian
- **Driving Licence:** Category B

LANGUAGES

- **Albanian:** Native
- **English:** Very good
- **Italian:** Basic

SAMUEL XHIXHO

JUNIOR FULL-STACK DEVELOPER

Applied Informatics graduate (diploma pending) and junior full-stack developer with hands-on experience building full-stack web, mobile and native Android applications. Focused on Angular, Spring Boot, Java, PostgreSQL and TypeScript, with practical experience across REST APIs, authorization, relational data models, Docker and application testing.

Tirana, Albania | samuelxhixho20@gmail.com | +355 69 258 2057

SELECTED PROJECTS

Shop Management System

Angular 22, Spring Boot 4, Java 21, PostgreSQL 18, Redis, Docker

- Building a modular-monolith business platform for products, SKUs, pricing, inventory, customers and orders.
- Designed goods-receipt and inventory-movement flows with transactional purchase-cost and weighted-average inventory-cost handling.

CircleChat

React Native, Expo, TypeScript, Supabase, PostgreSQL

- Built direct and group messaging with replies, reactions, typing, presence, image/audio/document messages and shared-content browsing.
- Implemented group roles, storage rules, PostgreSQL RLS, reporting, moderation and suspended/banned-account enforcement.

NightClock

Kotlin, Jetpack Compose, DataStore, Android

- Built an OLED-first landscape clock with five styles, pure-black fullscreen rendering, dim mode and persistent settings.
- Added burn-in position shifting and 5/15/30-minute timers with pause, resume, reset, sound and vibration.

PRACTICAL EXPERIENCE

Independent Software Development Projects

2026 - Present

- Plan, build, test and iterate on personal software projects across frontend, backend, databases and mobile.
- Use Git/GitHub, Dockerized services, database migrations and integration testing to keep development repeatable and maintainable.
- Earlier work includes responsive bakery, car-detailing and barbershop websites deployed online.

CAREER OBJECTIVE

Seeking a junior full-stack or backend developer role where I can contribute to real software, work with an experienced team and continue growing in Java/Spring, Angular, databases and system design.

References and additional project details available upon request.
